01 Executive intelligence brief

Executive summary

Tech Arch Softwares is a full-suite digital agency based in Panchkula, Haryana, offering website development, digital marketing, sales funnel creation, and graphic design services.

Current position: The business operates from IT Park Sector 22, Panchkula, maintaining an active website with verifiable client testimonials and Google Partner credentials, yet faces visibility and accessibility issues due to missing image alt attributes.
Biggest opportunity: Optimizing on-page SEO assets like image alt tags and streamlining media embeds to improve site speed and organic conversion rates.
Confidence: high

Key risks

- Heavy reliance on third-party video embeds and unoptimized media assets which may impact page performance.
- High volume of images lacking alt text descriptions, hurting accessibility and image search visibility.

02 Business model & customer acquisition

Business model: B2B Digital Agency / IT Services Provider operating on project-fee and retainer models.

Products and services

- Website Development
- Digital Marketing
- Sales-Driven Funnel Development
- Creative Logo and Graphic Design
- Responsive Design
- SEO & PPC

Target audiences

- Small and medium businesses seeking online growth
- Enterprises looking for web development and digital marketing solutions
- Brands wanting sales funnel development and graphic design

Customer acquisition channels

- Official Website
- Google Partner network
- Referral networks and client testimonials
- Social media channels (LinkedIn, Instagram, Facebook, YouTube)

Verified facts

- Tech Arch Softwares is located at Twin Tower, Plot No. 7, 3rd Floor, IT Park, Sector 22, Panchkula, Haryana 134116.
- The official website is https://www.techarchsoftwares.com/.
- The business phone number is 0172 299 6009.
- The company holds Google Partner agency status.

Assumptions to validate

- The business operates primarily on a project-fee and retainer model for ongoing digital marketing services.
- Most clients are acquired globally through their online presence and referral networks.

03 Local market & positioning

Positioned in Panchkula's IT Park sector as a comprehensive digital transformation and software services provider serving local and international clients.

Local market signals

- Located in IT Park, Sector 22, Panchkula, Haryana.
- Competes regionally within the IT services and digital marketing agency landscape in northern India.

Differentiation opportunities

- Leveraging verified Google Partner status and extensive video client testimonials to build immediate trust over local competitors.
- Bundling sales funnel development directly with web development services.

Evidence gaps

- Lack of public data regarding exact market share, local client volume, or annual revenue.

04 Competitor intelligence

Technijian India

Location relevance: Panchkula / Regional IT Services
Website: https://technijian.in/contact-us

Observable strengths

- Offers 24/7 enterprise IT support and global delivery centers
- Combines managed IT and cybersecurity services alongside digital marketing

Comparison: Technijian focuses heavily on managed IT infrastructure and cybersecurity support, whereas Tech Arch Softwares emphasizes creative web development, digital marketing, and sales funnel optimization.
Confidence: medium
Sources: https://technijian.in/contact-us

05 Digital presence & customer journey

Website status: verified_existing
Visitors land on a homepage featuring structured service categories, client testimonials, and video case studies, and can convert via a WordPress contact form or direct WhatsApp integration.

Channels found

- Official Website
- LinkedIn
- Instagram
- Facebook
- YouTube
- WhatsApp Business

Visibility gaps

- 72 out of 131 images lack alt text attributes, harming image search discoverability and accessibility.
- Potential performance bloat due to numerous embedded YouTube video links on the homepage.

Trust and conversion gaps

- Contact form lacks clear interactive incentives like instant quote calculators.
- Service pages could benefit from more detailed case study breakdowns rather than only video links.

06 Strategic insights

On-Page Accessibility and SEO Deficiency

Priority: high • Confidence: high • Category: seo
A significant portion of images (72 out of 131) on the homepage lack alt text attributes.
Evidence: Website inspection data reveals 72 images without alt text out of 131 total images.
Recommended action: Add descriptive, keyword-rich alt text to all unoptimized images across the website.
Expected impact: May improve organic search visibility and web accessibility compliance.

Media Asset Optimization

Priority: medium • Confidence: medium • Category: performance
The homepage includes numerous embedded YouTube links and video elements which may impact load speed.
Evidence: Multiple YouTube video URLs are embedded directly into the inspected page markup.
Recommended action: Lazy-load video embeds or replace heavy embeds with lightweight thumbnails linked to modals.
Expected impact: May enhance page load performance and user retention.

07 Prioritized growth opportunities

Conversion Rate Optimization via Interactive Elements

Priority: medium • Confidence: medium • Category: conversion
Current lead generation relies heavily on standard contact forms without interactive scoping tools.
Evidence: Inspection identified a standard WordPress contact form with 15 input fields and a submit button.
Recommended action: Implement an interactive project cost calculator or instant quote request flow.
Expected impact: May increase inbound inquiry conversion rates.

08 30 / 60 / 90-day action plan

FIRST 30 DAYS — Audit and populate missing alt text attributes across all website images.
Why this matters: Fixes foundational on-page SEO gaps and improves screen-reader accessibility.
Success metric: 100% of site images having descriptive alt text.
Dependency: CMS access
Priority: high

DAYS 31 60 — Optimize media embeds and lazy-load video elements on the homepage.
Why this matters: Reduces page weight and enhances mobile browsing performance.
Success metric: Improved page load speeds and reduced resource blocking.
Dependency: Development resources
Priority: medium

DAYS 61 90 — Redesign lead capture mechanisms to include a streamlined multi-step inquiry form.
Why this matters: Reduces friction for prospective clients seeking software and marketing quotes.
Success metric: Higher conversion rate on contact and quote request forms.
Dependency: UI/UX review
Priority: medium

09 Measurement plan

Organic Search Traffic
Tracks the effectiveness of on-page SEO improvements and alt-tag optimizations.
How to measure: Google Search Console and Google Analytics
Baseline: Unavailable from public data

Form Conversion Rate
Measures how effectively website visitors turn into inbound sales leads.
How to measure: Form submission tracking in Google Analytics
Baseline: Unavailable from public data

10 Supporting findings

Strengths supported by evidence

Strong Trust Signals
Priority: low • Confidence: high • Category: branding
Displays verified Google Partner badge and extensive video client reviews.
Evidence: Google Partner agency badge and numerous client video links present on the homepage.
Recommended action: Continue showcasing client testimonials prominently near call-to-action sections.
Expected impact: Maintains high visitor trust.

Risks and weaknesses

Accessibility Gaps
Priority: high • Confidence: high • Category: accessibility
Many images lack alt attributes.
Evidence: 72 out of 131 images missing alt text during inspection.
Recommended action: Add alt tags to all image assets.
Expected impact: Improves accessibility and SEO compliance.

Recommended improvements

Streamline Video Assets
Priority: medium • Confidence: medium • Category: performance
Heavy use of YouTube embeds on the homepage can be optimized for speed.
Evidence: Multiple YouTube video URLs found in page links.
Recommended action: Implement lazy loading for video embeds.
Expected impact: Enhances site load times.
