BUSINESS AUDIT REPORT

Business

Report ID: cmvkk9fih0000k8f05a8y7zp4
Generated: 23/10/2026

Branding note: Branding elements such as official logos, favicons, exact primary colors, and fonts were not detected or exposed in the inspected HTML source.

Pros

1. Clear Service Offerings

The homepage clearly outlines core agency capabilities such as web development, digital marketing, and funnel development.

Category: content

Evidence: Headings and text excerpt indicate sections for DIGITAL MARKETING, Funnel Development, CREATIVE LOGO, and WEBSITE DEVELOPMENT.

Recommended action: Maintain and further detail case studies for each core service offering.

Priority: medium

Expected impact: Helps prospective clients immediately understand the range of technical and marketing services provided.

Confidence: high

2. Extensive Testimonials and Social Proof

The homepage features multiple detailed client reviews praising responsiveness, reliability, and technical competence.

Category: business

Evidence: Text excerpt contains numerous client quotes and reviews from named individuals like Todd Pazicini, Stephen Warley, and Tim Jobe.

Recommended action: Organize these testimonials into a dedicated reviews or case studies page with filterable categories.

Priority: medium

Expected impact: Increases visitor trust and conversion rates by showcasing real client feedback.

Confidence: high

3. Active Communication Channels

The website provides direct links for user engagement, including a WhatsApp integration and a contact form.

Category: ux

Evidence: Links array includes an active WhatsApp API link and a contact page link.

Recommended action: Ensure response times on WhatsApp and contact forms are clearly stated to manage user expectations.

Priority: low

Expected impact: Improves user experience and lead capture potential.

Confidence: high

Cons

1. High Ratio of Missing Image Alternative Text

A significant number of images on the inspected page lack alt attributes, which negatively impacts accessibility for screen reader users.

Category: accessibility

Evidence: Image statistics show 131 total images, but 72 are missing alt attributes.

Recommended action: Add descriptive alt text to all informative images across the website.

Priority: high
Expected impact: Improves accessibility compliance and supports better image SEO.
Confidence: high

2. Redundant or Missing Navigation Links

The navigation structure includes empty text strings in link elements and duplicate links pointing to the homepage.

Category: ux
Evidence: Navigation links and general links arrays contain multiple entries with empty text values pointing to https://techarchsoftwares.com/.
Recommended action: Audit and clean up the HTML link structure to remove empty anchors and avoid redundant routing.
Priority: medium
Expected impact: Enhances usability and overall code hygiene.
Confidence: high

Improvements

1. Enhance Image Accessibility

Over half of the images inspected do not have alternative text, hindering screen reader navigation.

Category: accessibility
Evidence: Out of 131 images, 72 do not have alt attributes.
Recommended action: Implement a content audit to update all media library images with meaningful descriptive text.
Priority: high
Expected impact: Ensures better compliance with accessibility guidelines and improves screen reader compatibility.
Confidence: high

2. Optimize Navigation Link Labels

Several links within the navigation and footer contain empty anchor text, leading to poor user and crawler clarity.

Category: ux
Evidence: Links array lists multiple instances of empty text strings for internal links.
Recommended action: Review header, footer, and body link templates to ensure every anchor tag contains descriptive text.
Priority: medium
Expected impact: Provides clearer site architecture for both users and search engine crawlers.
Confidence: high

Limitations

- Only a single page (the homepage) was inspected.
- JavaScript was not executed, so dynamic components or client-rendered content could not be fully evaluated.
- No performance, actual loading speed, or core web vitals tools were executed.
